

CHOUTEAU COUNTY 2010 SOIL MOISTURE SURVEY

Overall the soil moisture was pretty good around the county this spring. Even in the stubble from last years crops it was above average. And that was before we had our late April storm. If you are considering recropping some of this stubble I suggest you sample your own fields to see what kind of moisture you have.

The winter wheat looked good around the county with just a few places showing some winter kill. As long as the rains keep on coming I think we should have a pretty good year.
